Delta-4 protein - human
Cispecies: Homo sapiens (man)
CiDate: 30-Jun-2001 #sequence_revision 30-Jun-2001 #text_change 09-Jul-2004
CiAccession: JC7570
CiAccession: JC7570
CiAccession: JC7570
CiAccession: JC7570
CiAccession: JC7570
Miritle: Molecular cloning of Delta-4, a new mouse and human notch ligand.
AiTitle: Molecular cloning of Delta-4, a new mouse and human notch ligand.
AiTitle: Molecular cloning of Delta-4, a new mouse and human notch ligand.
AiTitle: Molecular cloning of Delta-4, a new mouse and human notch ligand.
AiMolecule type: mRNA
AiResidues: J-685 < YON>
AiMolecule type: mRNA
AiResidues: J-685 < YON>
AiCross-references: UNIPROT:QPNR61; DDBJ:AB043894
CiComment: This protein, a member of the Notch family of proteins, is a transmembrane recates the Notch signaling, the growth or differentiation of vascular endothelial cells.
CiGenetics:
AiGene: delta-4
CiSuperfamily: delta-4 protein; EGF homology
CiKeywords: transmembrane protein
                                                                              458
                                                                                                                                        900
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            52
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               178
